Department of Justice, CrackDown & CAMP Programs	$ 4,000,000	$ 3,537,389

Approved for Distribution 5/27/10

Public Safety Procurement Program

The Public Safety Procurement Program manages two Federal programs which aid state and local agencies in their counter drug and law enforcement efforts: the 1033 Program allows state and local law enforcement agencies to acquire excess property from the Department of Defense. All property acquired through the 1033 Program must be used in support of law enforcement activities; and the 1122 Program is a federal program that allows state and local governmental agencies to purchase equipment through federal channels for Counter Drug, Homeland Security, and Emergency Response.

Drug Courts Program

The Drug Courts Program provides access to treatment for substance-abusing offenders while minimizing the use of incarceration, and providing structure by linking supervision and treatment with ongoing intensive judicial oversight and team management. All drug courts include intensive treatment services with ongoing monitoring and continuing care for approximately 12 months or more. Allocating additional funds to the Drug Courts Program will allow counties to enhance their existing treatment programs. Intensive judicial supervision provided by Drug Courts benefits local communities by providing cost savings to taxpayers through clients participating in treatment programs, and reduced offender recidivism rates.

Anti-Drug Abuse Enforcement Team Program

The Anti-Drug Abuse Enforcement (ADA) Team Program supports local multi-jurisdictional, multi-disciplinary task forces in all 58 counties. Funds have been allocated to the projects to actively reduce drug trafficking; violent crime and related activities; disrupt the importation, manufacture and distribution of illicit drugs; eradicate marijuana gardens on public and private lands; reduce the amount of illicit drugs and number of weapons being transported across California's borders for illegal activities; dismantle the trafficking organizations that commit these crimes; and remove children from illicit drug environments. Probation officers assist law enforcement by targeting felony probationers, and experienced prosecutors from county district attorney's offices are assigned to handle task force generated cases. Outside agencies provide staff to compliment the efforts of the task force.

CrackDown Multi-Community Task Force Program

The CrackDown Multi-Community Task Force Program serves the entire state by providing the Bureau of Narcotic Enforcement with the financial resources to combat the complex problems associated with arresting and prosecuting major drug dealers including; Columbian cartels, Mexican smugglers, and metropolitan street gangs involved in the manufacture, transport and distribution of cocaine, heroin, methamphetamine, and other illegal drugs. CrackDown also provides support to local drug enforcement teams with resources, equipment, and jurisdiction which would be lacking in the absence of this program.

Campaign Against Marijuana Planting

The Campaign Against Marijuana Planting (CAMP) Program is a seasonal law enforcement task force comprised of multiple federal, state, and local agencies expressly organized to help eradicate marijuana plants throughout the state. Eradication teams, along with four contracted helicopters, supplement 48 county sheriff's departments, the U.S. Drug Enforcement Administration, the U.S. Bureau of Land Management, the U.S. Forest Service, the U.S. National Park Service, the California National Guard, the California Department of Fish and Game, and the California State Parks to seek out and destroy any crops on public and private lands identified as marijuana.
